

Cloud Enterprise System for a Public Sector Organisation

Public Sector Business Challenges - Do more with less

The main business challenge within the Public Sector could be summed up as the constant need to do more with less. Less **money**, less **people**, but more **accountability**, more **changes** and greater **expectations** from your consumers. All this with a backdrop of legacy systems with no integration capabilities, complex products and services to offer, results in inefficient operations, inaccurate data, and inadequate support for strategic decisions.

A solution for your whole organisation

Finding software that connects all your customers, all your people and all the data you need to make decisions is much easier than you think – and more importantly less expensive. What's more you don't need to find the expertise internally – working with a partner like **In Cloud Solutions** means you get the latest technology and a size and pace you can handle. Tell us what you need to be able to do and we can do the rest.

Crown Commercial Service for G-Cloud 9 Framework

In Cloud Solutions is delighted to be listed by the government as a Crown Commercial Service supplier for cloud services to the G-cloud 9 framework on the Digital Marketplace. This is the go-to supplier directory for anyone in the public sector looking to embark on a cloud based project.

The process has been designed to make it easier for Public Sector Enterprises, from education and health to charities, to find excellent cloud technology suppliers and specialists to support their digital transformation journey.

Using this supplier list takes the guess work out of finding expert help and is much faster and cheaper than entering into individual procurement contracts.

The latest iteration of the government's G-Cloud framework is called G-Cloud 9 and users can find a Buyer's Guide to [how it works here](#)

Accountability and transparency

In Cloud Solutions only use SAP's Business ByDesign - the world's most carefully designed complete business suite. It is a cloud based ERP software as a service that connects every function of your organisation to proven best practices and in-depth analytics. Compliance comes as standard for your enterprise - out of the box. You'll get the foundation to scale without the complexity and cost, so you can pass the benefits you gain on to your constituents.

Best practice – out of the box

Built from the ground up with flexible business processes based on best practices from thousands of organisations. Instead of functioning with multiple systems, eliminate the silos impeding productivity and consolidate your operations in a single solution. This eliminates duplicate data entry while cleaning up redundant information throughout your organisation. In Cloud Solutions, has over 20 years' experience of offering software as a service delivering a simple, quick-to-implement package to dramatically improve your operations in as little as 9 weeks.

Future ready Software now

Business ByDesign meets the specific needs of your organisation, whether it's a local authority, a service or an education or research institute. Combining standard finance functions with features specific to public sector interests, SAP Business ByDesign is ideal for streamlining your daily operations and facilitating encumbrance accounting, fund accounting, and reporting. While compliance with today's regulations is important, you know the regulatory landscape will continue to evolve. Leading-edge technology from SAP can help ensure that your organisation has the built-in flexibility, accountability, and transparency to comply now and in the future.

Insightful and relevant analytics

Analytics aren't an add-on, they are embedded and a part of every Process so you get full transparency into every aspect of your organisation to make the right decisions. You can see where the organisation needs to adapt and improve allowing adjustments quickly to provide greater accountability.

Automatic, seamless updates and innovation.

SAP Business ByDesign is a safe, smart choice – backed by SAP and with a proven track record of ongoing investment, innovation, and delivery in the cloud. SAP consistently delivers new features and processes through quarterly product updates to allow you to take advantage of the latest innovations. You will always be ahead.

Implementation

In cloud Solutions is an award-winning Gold partner of SAP with a huge knowledge and skill base in the leading-edge business suite Technology - Business ByDesign. It arrives preconfigured anyway so is rapidly deployable, and of course keenly priced to be implemented at a size and cost that suits your organisation.

Security

The security of your data is our concern too - SAP have invested heavily in this area to produce the safest data centres in the world. Again being cloud based, security is updated constantly and your records will remain completely accessible for your business and totally safe from threats. The software can be configured to make sure you are compliant even for GDPR.

Take the next step

Join the hundreds of small and midsize organisations reaping the rewards of integrated and preconfigured business processes based on best practices, lower cost of ownership, and faster implementation. Visit us today at www.incloudsolutions.co.uk and take a look at our case studies or **call Caroline Atkinson on 01628 876732**. We would be delighted to give you a full no obligation demonstration.

Tried and tested by thousands of organisations across the world

Business ByDesign is already used in around 4,000 small and midsize organisations. It has been adapted to support 19 country localisations and 8 languages and is already running in over 95 countries. And by the way if there is a specific process you need that is not standard – there are over 100 easy to add-on solutions to choose from or we just make one for you.

BUDGETING, ENCUMBRANCE ACCOUNTING, AND ACCRUAL REPORTING

“SAP Business ByDesign multiplies the capabilities of our finance and project teams while improving the efficiency of critical processes and reporting. By reducing the time spent on administration, we can concentrate more on scientific activities that can advance the development of lifesaving vaccines.”

Dr. Odile Leroy, Executive Director, European Vaccine Initiative
