

CUB (Contract and Utilities Billing) from In Cloud Solutions Available on SAP® App Center

By integrating with SAP® Business ByDesign®, CUB delivers the ability to support complex billing scenarios for customers.

United Kingdom — 20 April 2020 — In Cloud Solutions Ltd today announced that its [CUB \(Contract and Utilities Billing\)](#) solution is now available on [SAP® App Center](#), the digital marketplace for SAP partner offerings. CUB works alongside the SAP® Business ByDesign® solution and delivers the ability to handle complex and bespoke contract billing scenarios to customers.

“The CUB solution has been designed to work with SAP Business ByDesign in a way that is intuitive and flexible, allowing our customers to offer inventive and attractive packages to their customers, which would not be feasible to manage without CUB,” says Bob Atkinson, Managing Director, In Cloud Solutions. “With SAP App Center, we can make our innovative solution available to the SAP community.”

CUB works alongside SAP Business ByDesign to upload customer usage and automatically generate invoices based on agreed contract rates and bandings. It allows Telcos, for example, to offer creative deals based on different call rates or other bundled deals where you might need to revert to a greater charge once the initial offer has run out. The solution can allow customers to process hundreds of invoices with configurable calculations accurately from a single file data upload with just a click of button. It is also possible to integrate with third party systems via web service integration.

At SAP App Center, businesses can discover approximately 1,800 innovative partner solutions that integrate with and extend SAP solutions. The solutions are SAP-validated and can be sorted by SAP product line, industry, solution type and use-case scenario, creating a seemingly endless supply of opportunities. Find, try, buy and manage SAP partner solutions digitally at www.sapappcenter.com.

In Cloud Solutions is a partner in the SAP PartnerEdge® program. As such, it is empowered to build, market and sell software applications on top of market-leading technology platforms from SAP. The SAP PartnerEdge program provides the enablement tools, benefits and support to facilitate building high-quality, disruptive applications focused on specific business needs – quickly and cost-effectively. The program provides access to all relevant SAP technologies in one simple framework under a single, global contract.
